About me

A highly motivated individual with a strong interest in Object-Oriented Programming (OOP), software troubleshooting, and application performance optimization. Passionate about writing clean, modular code and understanding core programming principles. Skilled in basic OOP concepts such as classes, objects, inheritance, encapsulation, and polymorphism. Familiar with programming environments and tools, particularly in languages like Java or C#. Eager to learn and grow in the field of software development, contributing to code maintainability and robust application design.

Education

Nagarjuna Degree College

Bangalore city University

Bachelor of Computer Applications.

◦ GPA: 7.9

Dec 2020 – May 2024

Projects

School Management System

- A software application designed to manage and streamline school administrative tasks like student records, attendance, and staff management.
- Enhances efficiency, reduces paperwork, and improves communication between students, teachers, and administrators.

Nutri Go

- A health-focused application that provides personalized meal plans based on user input like goals, allergies, and dietary preferences.
- Aims to promote healthy eating habits by offering tailored food suggestions, diet tracking, and access to nutritious recipes.

Skills

Tech Stack: MySQL, Python, HTML, CSS ,React
